PROFESSIONAL SUMMARY

Frontend & React Native Developer with 3 years of experience building and shipping production apps for Android and iOS. Specialized in real-time systems, state management, and performance optimization, with hands-on expertise across React Native, React.js, PixiJS, and Firebase. Delivered end-to-end features including push notifications, secure authentication, payment gateway integrations, and RESTful API-driven architectures. Comfortable owning apps from architecture through Google Play Console and App Store Connect release.

TECHNICAL SKILLS

Frontend: React Native, React.js, PixiJS, HTML, CSS, Bootstrap, Tailwind CSS, UI/UX Design Principles

State Management: Redux Toolkit, Redux Persist, AsyncStorage

Firebase: Firebase Authentication, Firebase Cloud Messaging (Push Notifications), Firestore (Real-time Chat)

Auth & Sign-In: Google Sign In, Firebase Auth, Role-Based Access Control

Payments: Razorpay Payment Gateway, Stripe

Notifications: Notifee, Firebase Cloud Messaging

APIs & Integrations: RESTful APIs, SignalR

Native & Deployment: Android Native Integration, Play Store Release (Google Play Console), App Store Release (App Store Connect)

Tools: Git, Performance Optimization, Real-Time Systems

EXPERIENCE

Android and iOS Developer | JDPC Global Pvt. Ltd. | Jaipur, India

June 2023 – Present

- Developed and maintained 3 years of production Android & iOS apps using React Native, delivering smooth UI, optimized navigation, and responsive layouts for real users at scale.
- Built multiple production-level apps — eFlatBook, eFlatBook Guard, TheMilan, Tea Of Jax, and Queen77 — with real-time systems and Firebase integrations.
- Integrated Firebase Cloud Messaging (FCM) for push notifications, real-time updates, and background services across all shipped apps.
- Implemented Redux Toolkit and Redux Persist for predictable state management and offline-first data persistence using AsyncStorage.
- Integrated Razorpay payment gateway for secure in-app payments, and Google Sign In / Firebase Authentication for user onboarding.
- Implemented QR code generation and scanning, secure authentication flows, and role-based access across apps.
- Owned the full release pipeline — Google Play Console and App Store Connect — managing testing, bug fixing, and post-release updates.

PROJECTS

eFlatBook — Apartment Security and Management System — play.google.com/store/apps/details?id=com.eflatbook

- Built a complete society management app using React Native, enabling residents to manage tenants, maintenance, complaints, and visitor entries in one platform.
- Implemented real-time updates and push notifications using Firebase Cloud Messaging (FCM), improving user engagement and response time.
- Developed secure tenant, family member, and flat management modules with smooth forms, validations, role-based access, and seamless navigation.

TheMilan — Dating Application — play.google.com/store/apps/details?id=com.Milan

- Implemented real-time chat using Firebase Firestore, enabling instant messaging, read receipts, and live presence tracking.

- Developed a modern dating application using React Native with smooth onboarding, profile creation, and swipe-based match interactions.
- Built premium subscription features, including Super Likes, profile boosts, and advanced visibility filters, backed by Razorpay payment gateway.

eFlatBook Guard — Security App — play.google.com/store/apps/details?id=com.eflatbook.guard

- Developed the security-side application of the eFlatBook system using React Native, designed specifically for society guards and security staff.
- Implemented QR code scanning for visitor and vehicle entry, enabling guards to validate resident-generated QR codes instantly.
- Added smart translation support (Hindi ↔ English) to help guards operate the app smoothly, improving usability across language backgrounds.

Tea Of Jax — Restaurant App — play.google.com/store/apps/details?id=com.teaofjax

- Built a React Native restaurant ordering app covering menu browsing, cart management, and order tracking with a smooth checkout flow.
- Integrated Razorpay payment gateway for secure order payments and Firebase Cloud Messaging for order-status push notifications.
- Used Redux Toolkit for state management across menu, cart, and order modules for a consistent, predictable user experience.

Queen77 — Live Results App — play.google.com/store/apps/details?id=com.tharway.queen77

- Built a React Native app for displaying live draw results in real time, with a custom timezone-safe scheduling system for accurate reset timing.
- Implemented Firebase Authentication and Notifee for secure sign-in and reliable local/scheduled notifications.
- Optimized REST API polling and data sync for performance on the Hermes JS engine.

Bird Sort — Puzzle Game — play.google.com/store/apps/details?id=com.jdpcbirdsort

- Built a colored-birds sorting puzzle game using PixiJS for smooth, canvas-based animations and rendering across 100 levels.
- Designed a difficulty-tiered star-rating system to replace a generic formula, improving rating accuracy and player satisfaction.
- Optimized rendering performance for consistent frame rates on lower-end mobile devices.

Slot Game — Casino-Style Game — icy-moss-0a36e5d10.7.azurestaticapps.net

- Developed a real-time slot machine game using PixiJS with animated reels, win celebrations, and smooth spin sequencing.
- Managed real-time balance updates and secure API communication for wallet synchronization.
- Optimized animation performance for a seamless, high-frame-rate gameplay experience.

GacorGame — Live Gaming Dashboard

- Developed a fast, responsive web-based gaming platform using React.js, optimized for smooth gameplay inside browser environments.
- Managed real-time balance updates, user wallet synchronization, and secure API communication.

Roc The Block — Events & Ticketing App — play.google.com/store/apps/details?id=com.roctheblockinc

- Developed a React Native application that helps users discover nearby events, browse locations, and register or book tickets seamlessly.
- Integrated RESTful APIs for event discovery and Razorpay payment gateway for ticket booking.

Poker Desk — Real-Time Multiplayer Poker Game (In Development)

- Building a real-time multiplayer poker game in React Native with a Socket.IO backend, handling live table state, turn sequencing, and multi-round gameplay.
- Engineered complex animation sequencing using React Native Reanimated — including custom FlyingCard and FlyingChip components for card distribution and chip-bet animations.
- Designed seat layout logic and connection-recovery flows (leave-desk handling) to keep gameplay stable under unreliable network conditions.

EDUCATION

Bachelor of Technology

Compucom Institute of Technology & Management | 2024
